PROFESSIONAL SUMMARY

Entry-level IT candidate with a foundation in AWS Cloud Computing, cloud infrastructure, Linux administration, networking, and troubleshooting. Gained hands-on experience in static website hosting using Amazon S3, database migration within AWS, and Generative AI application development using Amazon Bedrock and AWS Lambda. Familiar with DevOps fundamentals and cloud deployment, with an interest in building scalable, reliable, and efficient cloud solutions.

TECHNICAL SKILLS

AWS Cloud Services: EC2, S3, EBS, IAM, VPC, EFS, CloudFront, Route 53, RDS, DynamoDB, Lambda, Elastic Load Balancing, Auto Scaling
Monitoring & Messaging: CloudWatch, CloudTrail, SNS, SQS, SES
Linux Administration: File and directory commands, permissions (chmod), ownership, users/groups, ACLs, cron, process/package management, grep, sed, awk, systemctl, vi/vim, SCP
DevOps & Automation: Git, GitHub
Networking: IP addressing, CIDR, subnets, security groups, Internet Gateway, NAT Gateway, route tables, VPC peering, DNS
Programming & Databases: Java (basic), Python (basic), JavaScript (basic), MySQL, DBMS fundamentals
Generative AI: Generative AI fundamentals; introduction to AWS AI services

PROJECTS

1. Static Website Hosting Using Amazon S3

- Created a S3 bucket, uploaded static website files, configured static website hosting, and tested the website endpoint.
- **Technologies:** Amazon S3

2. Database migration within AWS Cloud

- Executed a database migration workflow within the AWS cloud environment.
- Worked with cloud database migration and data transfer concepts.
- **Technologies:** AWS DMS, Amazon RDS

3. End-to-End GenAI Application on AWS using AWS Bedrock and AWS Lambda

- Developed a generative AI application using Amazon Bedrock foundation models and AWS Lambda.
- Integrated AI inference with serverless application logic.
- **Technologies:** Amazon Bedrock, AWS Lambda

TECHNICAL TRAINING

AI-Powered AWS & DevOps
Teks Academy

- Completed training in AWS cloud Computing,including cloud infrastructure,storage,networking, and core AWS services.
- Currently undergoing training in DevOps tools and practices, including CI/CD pipelines, Git, GitHub, Jenkins, Docker, Kubernetes,Terraform, Maven and Shell Scripting.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering
DRK Institute of Science and Technology | 2020 | 58.8%

CERTIFICATIONS

- AWS Educate — Introduction to Generative AI.
- Innovian Technologies — Artificial Intelligence Workshop.

ACADEMIC PROJECT

Detecting Stress Based on Social Interaction in Social Networks
Technologies: NetBeans, MySQL, JavaScript, JSP

- Worked on a team project analysing social interaction data for patterns associated with stress indicators.
- Collaborated with a four-member team on a two-month academic project.

ACHIEVEMENTS AND ACTIVITIES

- Winner of a college-level throwball competition.
- Participated in Cisco Networking and Python programming.
- Participated in an AI workshops conducted by Innovian Technologies

SOFTSKILLS

- Communication
- Teamwork
- Time management
- Adaptability
- Critical Thinking
